On site window handle

Temporary operating tool during construction

DESCRIPTION

The on site window handle 30000-957 is developed for the easy operation of the lockcases 35000-720, 35300-720, 26000-720 and 26300-720 **during construction**. This way possible damaging of the final handles during the works is avoided. The on site handle **protects** the **inside mechanism of the lockcase** against dust, dirt and misuse by screw drivers.

After attaching the on site handle to the lock, the lock can be turned into the requested position. Keep in mind that there is no built-in click system at 90° or 180°.

Removing the on site window handle is similar to the removal of the baseless window handle.

CHARACTERISTICS

- Handle manufactured from black PA 6 synthetic material and spindle made from stainless steel.

ADVANTAGES

- Alternative for baseless window handle during construction.
- User-friendly.
- Reusable.
